## Case Study: Improving quality of life for people with intellectual disabilities and their families

ASPRONA Valladolid is a Spanish family association that offers integral services attending to the improvement of quality of life for people with disabilities and their families. Their programs include vocational training, labor insertion, special educational and rehabilitation for those with disabilities.

Through TechSoup Global Partner Proyecto Dono, ASPRONA Valladolid received donated Microsoft products including Windows XP Upgrade and Office Professional

ASPRONA Valladolid stated that “In most cases, the aid that we receive comes in the form of hardware, that’s why ‘Proyecto Dono’ fits our needs to provide the solution for software. This programme has allowed us to access state of the art programs, resolving the deficiencies that held us back when we used free software and making our daily work simpler and much more effective.”
